

Ashley Wise
United Surgical Partners International
St Louis Physician Alliance

Ashley Wise is the Vice President of Technology Innovation at United Surgical Partners International (USPI). In this role, she works across organizational boundaries to align people, processes and technology to help USPI meet the demands of the rapidly evolving healthcare sector. Ashley's role focuses on optimizing IT workflows, road mapping of technology needs, vendor evaluation and oversight and innovation pipeline development. Ashley also has primary responsibility for the deployment of a population health solution to support the 500+ providers in the St Louis Physician Alliance (SLPA) network and their affiliated Medicare ACO and to assist with participation in other alternative payment models.

Ashley previously worked as the Vice President of Strategic Systems for USPI, where she focused on developing technical infrastructure to support long term organizational strategies and alignment with USPI's physician and health system partners. She first joined USPI as the Director of Technical Operations, where she provided IT and Strategy consulting services for a network of 8,000+ physician partners.

Ashley graduated Magna Cum Laude and Phi Beta Kappa from the University of California at Los Angeles (UCLA) with a BA in Communication Studies. She went on to obtain her MBA from the University of New Mexico with dual concentrations in Operations and Marketing. Ashley holds professional memberships with both the American College of Healthcare Executives (ACHE) and the Health Information Management Systems Society (HIMSS).
